How to set up Subsonic Media Server

To set up Subsonic Media Server, you will need a computer running Windows, macOS, or Linux. You will also need to install the Subsonic Media Server software. The software is available for free from the Subsonic website.

1. Once you have installed the software, you will need to create a user account. You can do this by clicking on the "Users" tab in the Subsonic web interface.
2. Once you have created a user account, you will need to add your music collection to Subsonic. You can do this by clicking on the "Music" tab in the Subsonic web interface.
3. Once you have added your music collection to Subsonic, you can start streaming it to your mobile devices. To do this, you will need to install the Subsonic app on your mobile device.
4. Once you have installed the Subsonic app, you will need to log in with your user account. You will then be able to browse your music collection and start streaming music to your device.

Benefits of using Subsonic Media Server

There are many benefits to using Subsonic Media Server. Some of the benefits include:

- You can stream your entire music collection from your home computer to your mobile devices.
- You can access your music collection from anywhere in the world.
- You can share your music collection with friends and family.
- You can create playlists and listen to them on your mobile devices.
- You can control your music playback from your mobile devices.

Subsonic Media Server is a great way to stream music to your mobile devices. It is easy to set up and use, and it supports a wide variety of

devices and file formats. With Subsonic Media Server, you can enjoy your entire music collection on the go.
