Riddell argues that we are on the cusp of a new era, one that will be characterized by unprecedented technological change and social upheaval. He identifies four key trends that are shaping our future:

1. **The rise of artificial intelligence (AI).** AI is rapidly becoming more powerful and sophisticated, and it is poised to have a major impact on

every aspect of our lives, from the way we work to the way we interact with friends and family.

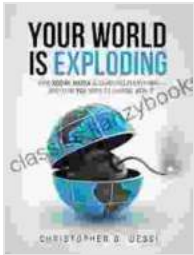

2. **The growth of the global economy.** The global economy is becoming increasingly interconnected, and this is leading to greater interdependence and competition. As a result, we need to be prepared for more frequent and severe economic shocks.
3. **The increasing interconnectedness of the world.** The internet and social media are making it easier for people from all over the world to connect with each other. This is leading to a greater exchange of ideas and innovations, but it is also making it easier for problems to spread.
4. **The rise of climate change.** Climate change is one of the most serious challenges facing our planet today. It is already causing major disruptions to our weather patterns, and it is only going to get worse in the years to come.

These four trends are all interconnected, and they are creating a future that is both exciting and frightening. Riddell argues that we need to be prepared for the challenges that lie ahead, but we should also be optimistic about the future. He believes that we have the power to create a better world, but only if we work together.

*Your World Is Exploding* is an essential guide to the future. It is a book that will help you to understand the changes that are happening and how to prepare for what's to come. If you want to be ready for the future, then you need to read this book.

## **About the Author**
